Note on Building Value Above

Any improvements made by the County during the lease term are not included in the building value recognized here.

***These financial statements reflect only the lease payment received by the District for the month of July, after which the County began paying OSHPD directly for the building lease. These lease payments should still be recognized by the District as income, and should likely be offset by principal and interest on a contingent liability to OSHPD, but the accounting for the payment of lease income to OSHPD starting with the payment for the month of August 2020 has not yet been finalized and recorded on the District books. Also, no contingent liability has yet been recorded on the District's books for the liability to assign over all lease income until January 31, 2026.

****The District incurred a liability for its share of the November 2020 election, but the bill has not yet been entered into QuickBooks and the cost and liability is not reflected on these financial statements. The budgeted amount is approximately \$60,000 but the amount could be higher or lower than this.

The format of these financial statements differs from generally accepted accounting principles in that it combines the activities of two separate funds, the General Fund and Leasing Fund, into one statement even though the two funds are on separate bases of accounting and different fund types. Under generally accepted accounting principles, these two funds would be presented on separate sets of financial statements for each fund, but this was not deemed necessary for interim financial reports such as this one. The statements of revenues and expenditures/expenses also do not show beginning and ending fund balances as is customary in GAAP financial statements and the classification and order of presentation of the items differs from GAAP in order to avoid having to perform extensive modification to the financials produced by the accounting system.

Substantially all disclosures and a statement of cash flows were omitted for efficiency, but these are required under Generally Accepted Accounting Principles.

No assurance is provided on these financial statements by an independent accountant.

***Budgetary basis is modified accrual, except that revenues are recognized when received and outgoing grants when encumbered. Proprietary fund is on full accrual basis.**

Budget Assumptions

The Budget presented on this report is the budget that has been adopted by the Board. The "Budget" column has not been updated for any approved amendments that occurred after the end date of this report, nor for any expected changes in income or expenses that have not been formalized by budget amendment. The 2020-2021 budget was adopted based on the planned operation of the District as of June 2020, which included planned staffing of 6 part-time personnel, 1 full-time Executive Director and changes to programs that the Board had planned at that time. The other components of the budget were based largely on prior year results, with a slight increase in property taxes. Assumptions incorporated in amendments to the budget are generally specified in the resolution adopting the amendment. Budget amendments are generally recognized when actual amounts become better known as the year progresses and adjusted based on those actual amounts. For example, once the District reviews fall grant applications, it normally amends the budget to include with

the actual amount of applications it desires to fund.

Actual	Budget	over Budget	% of Budget
--------	--------	-------------	-------------

***The budgetary basis recognizes debt principal payments as expenditures but does not recognize depreciation expense. GAAP recognizes depreciation expense but does not recognize principal repayment expenditures because principal repayments are treated as reductions to the liability balance on the balance sheet. These financial statements reflect only the lease payment received by the District for the month of July, after which the County began paying OSHPD directly for the building lease. These lease payments should still be recognized by the District as income, and should likely be offset by principal and interest on a contingent liability to OSHPD, but the accounting for the payment of lease income to OSHPD starting with the payment for the month of August 2020 has not yet been finalized and recorded on the District books. Also, no contingent liability has yet been recorded on the District's books for the liability to assign over all lease income until January 31, 2026.

****The District incurred a liability for its share of the November 2020 election, but the bill has not yet been entered into QuickBooks and the cost and liability is not reflected on these financial statements. The budgeted amount is approximately \$60,000 but the amount could be higher or lower than this.

The format of these financial statements differs from generally accepted accounting principles in that it combines the activities of two separate funds, the General Fund and Leasing Fund, into one statement even though the two funds are on separate bases of accounting and different fund types. Under generally accepted accounting principles, these two funds would be presented on separate sets of financial statements for each fund, but this was not deemed necessary for interim financial reports such as this one. The statements of revenues and expenditures/expenses also do not show beginning and ending fund balances as is customary in GAAP financial statements and the classification and order of presentation of the items differs from GAAP in order to avoid having to perform extensive modification to the financials produced by the accounting system.

Substantially all disclosures and a statement of cash flows were omitted for efficiency, but these are required under Generally Accepted Accounting Principles.

No assurance is provided on these financial statements by an independent accountant.
